Take Control Over Your Obsessive Thoughts and Behaviors

Deep TMS™ is FDA-cleared and clinically proven to alleviate symptoms of OCD without causing significant adverse or long-lasting side effects.

Short Treatment Sessions in Our Office

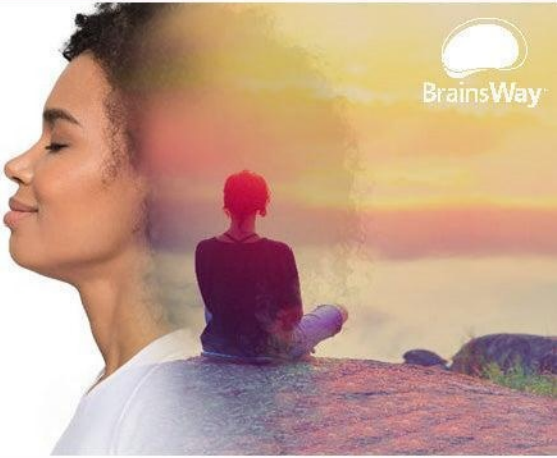

Deep TMS for Obsessive-Compulsive Disorder consists of 29 sessions across a 6-week period. Each session takes approximately 30 minutes.

Clinically Proven to Improve Symptoms

In real clinical practice, among patients who completed a treatment course of 29 Sessions, more than 1 in 2 achieved response - this represents greater than 30% reduction in symptoms.

No Systemic Side Effects Commonly Associated with Medication

Years of safety data support noninvasive Deep TMS treatment. Patients can resume daily activities immediately after each treatment session.
